Petition under 37CFR § 1.84 for Acceptance of Color
Drawings

in

Patent Application

of

January Kister, James Jaquette and Steve Fahrner

for

See-Saw Interconnect Assembly with Dielectric Carrier Grid
Providing Spring Suspension

RATIONALE

The file of this patent application contains Figures 7, 8 executed in color depicting regions of similar stress and alternating regions of similar displacement of described features of the invention.

The use of color is mandatory and commonly used in the arts to depict in a sufficiently contrasted fashion a multitude of adjacent regions having slightly different properties such as stress and displacement. Hence the Applicants respectfully request the color drawings being admitted in the application upon payment of the enclosed fee set forth in 37CFR § 1.17(h). Three sets of the color figures are enclosed with this petition as well as black and white photocopies.

Respectfully

A handwritten signature in black ink, appearing to read "Johannes Schneeberger".
